

Dear Robotics Teams:

Thank you for participating in the 2026 Oxford Invitational Youth Robotics Challenge.

Organizers of the challenge will be reaching out to media outlets in the area to offer opportunities to tell your story about entering this innovative challenge.

**We have enclosed a short form for the team to fill out to include some quotes about your participation in the event.** These quotes will be used in a press release that will be sent out to the local media, who can opt to use the provided quotes, or may seek to visit your team for an interview.

**By filling out the form and appearing in the photograph, you are granting permission for the images and quotations to be used in publications, websites, social media sites, including YouTube and other related materials.**

If you need some ideas on putting some quotes on paper, consider the following questions:

- Why are you participating in the Youth Robotics Challenge?
- What are you hoping to learn or accomplish?
- How do you think the challenge applies to real work scenarios?
- What are the biggest hurdles your team faces towards completing the challenge?

Teams are also asked to submit a photo with their press form, which will also be distributed to media outlets.

Feel free to have fun and great creative with the photo! Ideas include taking your team photo in front of your school, or an interesting background. The more creative you get, the more likely it could land in your local paper or on a news website.

Please submit completed form with your team photo to:  
[jane@workforcedevelopment.ca](mailto:jane@workforcedevelopment.ca)

**Deadline: October 29, 2026**
